PAYLOAD

2,920 kg

LOADING BED

3.60 × 1.93 m

UNLADEN WEIGHT

580 kg

The **MT 365-35 T** is the long-bed tandem torsion transporter: 3.60 × 1.93 m of deck, 3,500 kg gross weight minus 580 kg unladen, 2,920 kg payload. The length is for 2.6 t class excavators with their attachments, wheeled dumpers and compact wheel loaders. A Müller MB 26 S at 2,780 kg leaves 140 kg for the bucket, so weigh any further attachment against that reserve. A reinforced drive-on ramp plus width-adjustable rear hatch drive-on ramps, 9 mm waterproof laminated plywood floor, brakes, 2.41 m overall width. Fully welded, hot-dip galvanised frame, built by Tiki Treiler in Estonia. EU whole-vehicle type approval with COC, ready to register in Germany. Delivery in 4 to 6 weeks.

Type approval	EU whole-vehicle type approval, COC included
Importer	Müller Machinery

Manufacturer data, Tiki Treiler. Payload = gross vehicle weight – unladen weight. The towing capacity of your vehicle must cover the actual weight of trailer and load.

Towing vehicle & driving licence

The licence category follows the trailer's **registered** gross vehicle weight, not its load; your towing vehicle's towing capacity must carry trailer and load. The documents of towing vehicle and trailer are decisive – this note is not legal advice.
