LOADING BED

3.00 × 1.50 m

UNLADEN WEIGHT

640 kg

The **MT 300-30 TL Alu** is the 3 m leaf-spring model with a corrugated aluminium floor in place of plywood, for tracked machines that come off site wet and muddy. 2,990 kg gross weight minus 640 kg unladen leaves a 2,350 kg payload on a 3.00 × 1.50 m bed with 290 mm sides, sized for 1.8 to 2.2 t mini excavators; a Müller MB 18 at 1,875 kg still has 475 kg in reserve for the bucket. Reinforced drive-on ramps, braked tandem leaf-spring axles, gross weight registrable at 2,840 or 2,990 kg. Fully welded, hot-dip galvanised frame, built by Tiki Treiler in Estonia. EU whole-vehicle type approval with COC, ready to register in Germany. Delivery in 4 to 6 weeks.

Manufacturer data, Tiki Treiler. Payload = gross vehicle weight – unladen weight. The towing capacity of your vehicle must cover the actual weight of trailer and load.

Towing vehicle & driving licence

The licence category follows the trailer's **registered** gross vehicle weight, not its load; your towing vehicle's towing capacity must carry trailer and load. The documents of towing vehicle and trailer are decisive – this note is not legal advice. The gross vehicle weight is chosen at registration (options in the weights table).
