Manufacturer data, Tiki Treiler. Payload = gross vehicle weight – unladen weight. The towing capacity of your vehicle must cover the actual weight of trailer and load.

Towing vehicle & driving licence

The licence category follows the trailer's **registered** gross vehicle weight, not its load; your towing vehicle's towing capacity must carry trailer and load. The documents of towing vehicle and trailer are decisive — this note is not legal advice. The gross vehicle weight is chosen at registration (options in the weights table).
